

LOG OF MEETING

SUBJECT: Peroxisome Proliferators/Phthalates

DATE: December 4-5, 2002

TIME: 8:30 a.m. to 4:30 p.m. December 4 and 8:30 a.m. to 12:30 p.m. December 5

PLACE: Wyndham Washington Hotel, 1400 M Street, NW, Washington, DC

ENTRY SOURCE: Michael A. Babich, HS

COMMISSION REPRESENTATIVES: Michael A. Babich, Marilyn L. Wind, Health Sciences

NON-COMMISSION REPRESENTATIVES: Members of the peroxisome proliferators and human relevance working groups, peer reviewers, and ILSI staff.

Summary:

This is one of a series of workgroup meetings on peroxisome proliferators organized by the International Life Sciences Institute (ILSI) for the U.S. Environmental Protection Agency (EPA). A related working group on human relevance also met. The two working groups met in combined sessions, as well as in separate groups. Participants included scientists from federal agencies, industry, and academia. The purpose of the peroxisome proliferators workgroup is to review the state of the science on the human relevance of animal tumors induced by peroxisome proliferators, such as phthalate esters. The purpose of this meeting was for peer reviewers to provide comments on the draft report. The working group then made plans to finalize the workgroup report. The working group conclusions will be presented at scientific conferences and the final reports will be published in biomedical journals.
